PROFILE

> B.Sc. Computer Science graduate (HIT) who builds AI products end to end and ships them: an AI tutor on the Claude API with RAG and prompt caching, a RAG code assistant that swaps between OpenAI and Claude, and a local LLM that answers only from cited sources. I work with Claude Code every day, write tests for what the model can get wrong, and as a teacher I'm used to turning technical problems into clear answers for non-technical people.

AI PROJECTS

EasyMat - AI math tutor for the Israeli Bagrut demo · code

- RAG over an Obsidian knowledge base in Pinecone with integrated embeddings; incremental sync uploads only changed chunks and removes deleted ones.
- Streamed Claude API answers with prompt caching (about 90% cost reduction); handwritten equations from a photo are transcribed to LaTeX and solved.
- Practice mode serves real Bagrut questions with the official answers and no model call; tone and curriculum adapt to the student's level, in Hebrew or English.
- 101 Vitest tests, including the chat route: model selection, streaming, refusals, error handling and rate limiting.

Next.js · TypeScript · Claude API · Pinecone · RAG · KaTeX · Vitest

CodeMate AI - RAG code assistant demo · code

Upload a codebase and chat with it: parsing, chunking, embeddings, vector search and generation. Embedder and ChatModel interfaces switch between OpenAI, Claude and a keyless demo mode with no provider branches in the routes; pytest in CI.

Python · FastAPI · OpenAI API · Claude API · ChromaDB · React · TypeScript

HardenGarden - Linux security auditor with a local LLM site · code

Runs fully on-prem: a local model (Ollama) explains findings from a cited knowledge base and says "not enough information" below a confidence threshold. Allowlisted commands with no shell, a loopback-only API with a per-launch token, signed releases and a STRIDE threat model.

Python · FastAPI · Ollama · ChromaDB · Tauri · React · Docker

NitaiBot - Telegram bot on the Claude API code

Turns a product name or SKU into a full Hebrew product page with specs and SEO-ready HTML for WordPress; deployed on a live server with Flask and Gunicorn.

FULL-STACK & SYSTEMS

SalaryNet - ASP.NET Core 8 API in Clean Architecture, SQL Server, JWT roles with IDOR protection; Vue 3 and Angular clients; 162 xUnit tests with Testcontainers. code

SalSmart - Ingests 1.6M prices per run on Kubernetes; FastAPI, PostgreSQL, RabbitMQ alerts, Prometheus and Grafana. code

SKILLS

AI & LLMs	Claude API · OpenAI API · RAG · Embeddings · Pinecone · ChromaDB · Ollama (local LLMs) · Prompt caching & streaming · Claude Code
Languages	TypeScript · Python · C# · JavaScript · SQL · Bash
Web & Backend	React · Next.js · .NET 8 / ASP.NET Core · FastAPI · REST APIs · Vue · Angular
Data & Infra	PostgreSQL · SQL Server · Redis · RabbitMQ · Docker · Kubernetes · GitHub Actions · Vitest, pytest, xUnit

EXPERIENCE

Mathematics and Computer Science Teacher 2025 – Present
Yeshivat Bnei Akiva Lapid, Modi'in

- Teach Python and advanced mathematics, explaining complex ideas clearly to students at different levels.

IDF C4I Corps - Command & Control (C2) Department 2014 – 2017 · Reserves: 2017 – Present

- Installed, connected and troubleshot command-and-control systems; managed user permissions and secure data transfer between classified and unclassified networks.

EDUCATION

B.Sc. in Computer Science - Holon Institute of Technology (HIT) · Hebrew: native · English: very good 2021 – 2025
